-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

## **DETAILED ACTION**

### ***Drawings***

1. Figures 1-2 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-27 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. The term "substantially the same" in claims 1-19 and 24-27 are relative terms, which render the claims indefinite. The term "substantially" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Here, it is not definite which parts of the certificates should be identical and

Art Unit: 2134

which parts are allowed to be different. If this is an authentication method different from the conventional manner it is not understood.

4. In claim 12, the terms "the other network device" is vague and indefinite, because, it is unclear which network device it is referring. For purposes of this rejection it is presumed to be "another network device" since it is being stored after a transmission.

5. Claims 20-23 recites the limitation "the client based in part" in claim 20, lines 7. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-27 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Mitty et al., U.S. Pat. No. 6,145,079, hereinafter '079.

8. As per claims 1-27, '079 teaches a secure transactions method, apparatus, and system for using an intermediary for services having: a client/ sender /network device, network, first or received certificate /senders stored certificate at enrollment /component of storage, a server /intermediary, a second or another or resent certificate/component request /intermediary validation of the sender's digital certification, authenticating or comparing/determining the client if first and second

certifications are the same. Having the first 'stored' certificate generated by a other network device/server /third party /CA; a trusted mechanism for sending /transport access /keys /tokens /encryption /user, client proving ownership /certificate validation /digital signature /hash /digest etc., client or third party generation of certificate, storage /database [117], a client/ personal computer etc. (abs., sum. figs. 1A-3A, and 8, col. 3, lines 9-20 et seq., col. 4, lines 25-67 et seq., col. 7, lines 40- col. 8, lines 48 et seq., col. 10, lines 30-55 et seq., and col. 14-15 et seq.. As understood, the client generating his own certificate is being construed as the client being his own CA.
